natural catastrophes
every year

Calm before, during and after the storm.

Reduce storm damage from water and debris with 3M™ Safety & Security Window Films and Attachment Systems.

- ▶ Helps provide protection to people and property from flying glass and reduces damage from water and debris, by helping to hold the glass in the frame
- ▶ Tested in accordance with industry standards for Hurricane Protection: ASTM E1886/1996 and ASTM E330
- ▶ Reduce the need to scramble to install plywood or storm protection
- ▶ Reduce costs, by helping to maintain operations after a hurricane or windstorm
- ▶ Some insurance companies may reduce insurance premiums, saving you money

Information NOT intended for use in Florida for Windstorm Applications due to Florida Regulations.

Protecting your loved ones.

What was the first thing your parents told you to do in the event of a severe windstorm or a hurricane? "Stay away from the windows." Windows are one of the weakest points of your home or building. Storm debris can break through your windows, sending hazardous glass fragments and storm debris flying. Fortify your windows with 3M™ Safety & Security Window Films and 3M™ Impact Protection Attachment Systems, to reduce the risk of window breakage or serious injury to you or your family.

Protect those who cannot protect themselves.

Some of the most vulnerable times in our lives are when we are unable to help ourselves, whether that is due to illness or injury, or simply while we are asleep. Many hospital patients are unable to move quickly in the event of a natural disaster. Should a window(s) break, these individuals may be directly exposed to the force of the storm. Use 3M™ Safety & Security Window Films and 3M™ Impact Protection Attachment Systems to help protect those who cannot protect themselves.

Protect your assets.

If a hurricane or severe windstorm broke every window in your building, the expense of replacing all of those windows would likely pale in comparison to costs such as lost work time, property damage due to water/debris, and disruption of revenues. 3M™ Safety & Security Window Films can help hold your glass in place during a storm, helping to reduce damage inside the building, which will help you to get your building up and running faster.

Security with a payback.

Unlike many security upgrades, 3M™ Window Films can also provide a payback in as little as three years. 3M™ Safety & Security Window Films can include solar energy rejection, which helps reduce air conditioning costs and saves you money.

Natural Disaster Statistics*

Annual Averages	
Natural disasters	440 per year
Deaths caused by natural disasters	Nearly 50,000 per year
